PROFESSIONAL SUMMARY

Electrical Engineer with 3+ years in MV/LV distribution network maintenance: preventive and corrective maintenance planning, fault analysis, and outage and switching coordination. Plans maintenance for 30+ MV feeders across 20+ substations, contributing to SAIFI (17%, 2025) and SAIDI (16%, 2026) gains against 1% targets. PMP®-certified, with MV/LV project coordination experience under SEC's Unified Contract.

EDUCATION

- **Technical College**
  Bachelor of Applied Engineering – Electrical Engineering
  GPA: 3.75 / 5 (Very Good)
  Graduation Year: 2023

EXPERIENCES

Saudi Energy Company
Distribution Network Engineer | May 2024 – Present

- Plan and prioritize preventive and corrective maintenance across 30+ MV feeders in 20+ substations, defining scope of work and execution sequence for each activity.
- Develop Switching Programs for planned outages, defining isolation, restoration, and load-transfer sequences that keep customers supplied, contributing to SAIFI (17%, 2025) and SAIDI (16%, 2026) gains against 1% targets.
- Coordinate outage approvals and scheduling with the Network Control Center, validating plans against feeder SLDs and network layouts for accuracy and safety compliance.
- Conduct network inspections and prepare inspection reports; perform Root Cause Analysis of faults to support corrective and preventive actions.

Dussur Contracting Company
Electrical Engineer (Project Coordination) | Nov 2023 – Apr 2024

- Planned and monitored 2 MV/LV overhead-to-underground network projects across 2 regions under SEC's Unified Contract, using Waterfall methodology from planning through closure.
- Reviewed scope of work and deliverables with SEC and the Project Manager; developed project schedules and work sequencing plans defining execution phases and timelines.
- Prepared progress claims and invoices based on executed works and BOQ items.
- Secured excavation permits and statutory approvals to ensure regulatory compliance before site works.
- Managed resource allocation across 5+ field teams, approving work team forms and controlling project documentation.

Alamjad Engineering Consultants
Electrical Technician | Aug 2022 – May 2023

- Executed electrical works per approved drawings and specifications in compliance with the Saudi Building Code (SBC), at commercial and industrial sites including Al-Haram Plaza and Modon.
- Assisted in installation and maintenance of electrical systems, and in fault inspection and troubleshooting under engineers' supervision.

PROFESSIONAL CERTIFICATIONS

- PMP® – Project Management Professional (PMI), 2026
- Professional Classification – Saudi Council of Engineers

COURSES

- PMP® Preparation Course (35 PDUs) – PM TRICKS, 2026
- Electrical Connection Systems Testing and Hazards – Royal Commission for Jubail & Yanbu, 2024
- Occupational Health & Safety (NEBOSH IGC Standards) – Top Developed Institute for Training, 2023
- Electrical Fault Analysis and Protection Systems

SKILLS

Technical Skills

- Preventive & Corrective Maintenance
- Fault Analysis & Root Cause Analysis
- Network Inspections & Reporting
- Outage Planning & Switching Programs
- Emergency Fault Handling

Networks & Systems

- MV/LV Distribution Networks
- Protection Systems & Electrical Safety
- SLD & Network Layout Review
- SAP, SCADA & Microsoft Office
- Project Planning & Scheduling (PMP)

LANGUAGES

- Arabic – English.
